

NATIONAL CONFERENCE ON REPROGRAPHIC RIGHTS AND COPYRIGHT ACT : CHALLENGES AND MANAGEMENT

(NCRRCA-2013)

7-8 March 2013

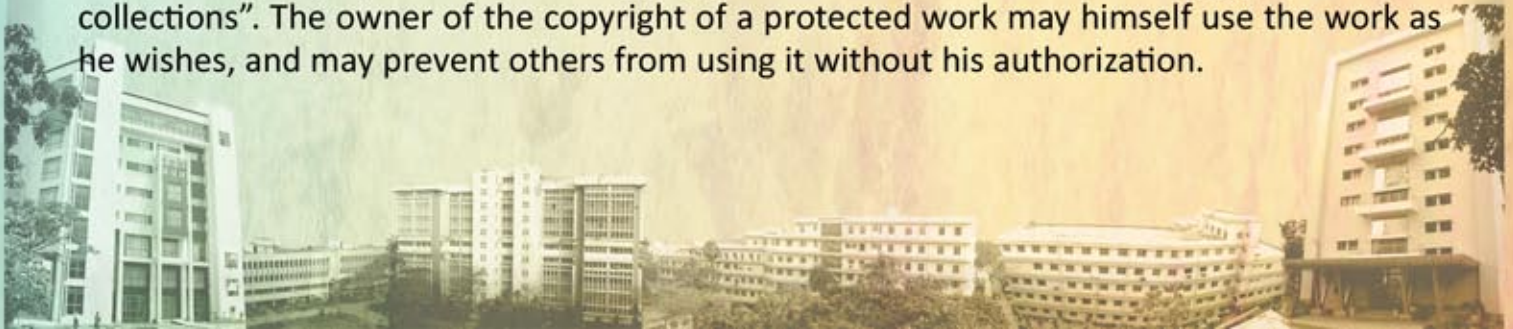

Reprography & Photography Unit
Library, Documentation & Information Science Division
Indian Statistical Institute
203 BT Road
Kolkata 700108

Overview

Reproduction, or copying, takes place in various forms like printing, photocopying, scanning, digital copying in CDs, DVDs or computer disk or as electronic storage in databases. The right of reproduction thus covers copying in different forms like photocopy, microfilm or microfiche, CD-ROM, electronic database, online etc.

In this context, comes the concept of Fair Use or Fair Dealing, which allows use of works without the authorization of the owner of rights and taking into account factors like the intensity, nature and purpose of use, including whether it is (a) for commercial purposes, (b) the nature of the work used, (c) the percentage of the whole work used in relation to the work as a whole and (d) the likely potential effect of the use on the commercial interest of the work. On the other hand, the right of the owner of the copyright to prevent others from copying his work is the most basic right under the concept of copyright. Hence, the right to control the act of reproduction is the legal basis for many forms of exploitation of protected works.

In the arena of intellectual property, copyright is concerned with the protection of literary and artistic work. The Berne Convention and TRIPS Agreement specifies " the expression literary and artistic works shall include every production in the literary, scientific and artistic domain, whatever may be the mode or form of its expression,shall be protected as such, without prejudice to the copyright in each of the works forming part of such collections". The owner of the copyright of a protected work may himself use the work as he wishes, and may prevent others from using it without his authorization.

The right of reproduction is an exclusive right under the international conventions and copyright laws in most countries. The Reproduction Rights Organizations (RROs), established in response to the need to license wide-scale photocopy access to the literary, scientific and artistic works, controls and issues licenses on behalf of the right holders, collects license fees and distributes those to right holders.

The conference aims to reach a solution as to how adequate services can be provided by the libraries without encroaching upon the rights of the copyright holders. It will focus on the questions of reproduction, document delivery services provided by the educational institutions and the questions of copyright that arise thereby relating those to the management of the same.

The Conference will discuss on the following themes*:

- **Reprography Service in Library**
- **Reprographic rights**
- **Fair Use & Fair Dealing in Education and Research**
 - Clipping and copying materials into innovative teaching tools.
 - Posting materials for Distance Learning.
 - Developing databases of copyrighted works for education and research.
 - Developing digital libraries.
- **Intellectual Property Rights**
- **Copyright in General**
- **Libraries and Copyright**
 - Preservation of Unpublished Works in the Library Collections
 - Copies for Preservation or Replacement
- **Access vs. Copyright**
- **Copy management and copy protection**
- **Copyright Infringement**
- **Rights protected by copyright laws**
