The workshop will include presentations in the areas of pattern recognition and image analysis emphasizing applications involving <i>signal processing, image compression, image and video processing, content-based image and video retrieval, remote sensing, computer graphics</i> and related areas. The workshop will also include presentations from the participants. No prerequisite is envisaged for participants. In each topic, attempts will be made to build up fundamental concepts followed by an introduction to some of the modern research directions.</p> <p>Speakers</p> <p>The speakers from Indian Statistical Institute (ISI) have been carrying out basic and applied research in areas of pattern recognition, image processing, evolutionary computing, neural modeling and remote sensing. Besides contributing regularly to national and international journals and conferences, they publish books, serve in journal editorial boards, collaborate with several national and international universities, organize international conferences and supervise postgraduate research in these areas.</p> <p>Interested candidates should submit before January 31, 2012 (through email only) their applications as per following format along with a passport size photo to:</p> <p>Prof. D.
