

S. No.	Paper ID	Title of the Paper
1	13	A Fuzzy-LP Approach in Time Series Forecasting
2	16	Variants of Locality Preserving Projection for Modular Face and Facial Expression Recognition
3	25	Hierarchical Ranking of Cricket Teams Incorporating Player Composition
4	26	K-Means Algorithm to Identify k1-Most Demanding Products
5	27	A Metaphor Detection Approach using Cosine Similarity
6	28	Feature selection and fuzzy rule mining for epileptic patients from clinical EEG data
7	32	Spatial Distribution based Provisional Disease Diagnosis in Remote Healthcare
8	37	Stacked Features Based CNN For Rotation Invariant Digit Classification
9	40	Named Entity Identification Based Translation Disambiguation Model
10	47	Detection of Atypical Elements by Transforming Task to Supervised Form
11	50	Third Order Backward Elimination Approach for Fuzzy-Rough Set based Feature Selection
12	52	Improving the Performance of Deep Learning based Speech Enhancement System Using Fuzzy Restricted Boltzmann Machine
13	61	LEXER: LEXicon based Emotion analyzer
14	65	Extraction of Phenotypic Traits for Drought Stress Study using Hyperspectral Images
15	68	A Robust Color Video Watermarking Technique Using DWT, SVD and frame differences
16	71	kNN Classification with an Outlier Informative Distance Measure
17	73	Automated Measurement of Translational Margins and Rotational Shifts in Pelvic Structures using CBCT Images of Rectal Cancer patients
18	80	Smart Water Management: An Ontology-driven Context-aware IoT application
19	81	Label Correlation Propagation for Semi-Supervised Multi-Label Learning
20	88	Selection of Relevant Electrodes based on Temporal Similarity for Classification of Motor Imagery Tasks
21	89	Aggregated Channel Features With Optimum Parameters for Pedestrian Detection
22	90	Formulation of Two Stage Multiple Kernel Learning using Regression Framework
23	92	Efficient and Effective Multiple Protein Sequence Alignment Model Using Dynamic Progressive Approach with Novel Look Back Ahead Scoring
24	93	Object Tracking with Classification Score Weighted Histogram of Sparse Codes
25	102	Spatio-temporal Prediction of Meteorological Time Series Data: An Approach based on Spatial Bayesian Network (SpaBN)
26	106	A Two-Stage Conditional Random Field Model based Framework for Multi-Label Classification

27	107	A Study on Deep Convolutional Neural Network Based Approaches for Person Re-Identification
28	111	A Machine Learning Inspired Approach for Detection, Recognition and Tracking of Moving Objects from Real-time Video
29	112	Lexical TF-IDF: An n-gram Feature Space for Cross-Domain Classification of Sentiment Reviews
30	115	Neural Networks Compression for Language Modeling
31	122	Tree-based Structural Twin Support Tensor Clustering with square loss function
32	123	Structured Prediction of Music Mood with Twin Gaussian Processes
33	124	Differentiating Pen Inks in Handwritten Bank Cheques using Multi-layer Perceptron
34	133	A Novel OCR System based on Rough Set Semi-Reduct
35	134	Exploring the scope of HSV color channels towards simple shadow contour detection
36	143	Mining Rare Patterns using Hyper-Linked Data Structure
37	146	Opinion Mining using Support Vector Machine with Web based Diverse Data
38	154	Linear Curve Fitting-based Headline Estimation in Handwritten Words for Indian Scripts
39	155	Does Rotation Influence the Estimated Contour Length of a Digital Object?
40	156	Random Binary Search Trees for Approximate Nearest Neighbour Search in Binary Space
41	157	Harnessing Online News for Sarcasm Detection in Hindi Tweets
42	163	Classification of Vector-borne Virus through Totally Ordered Set of Dinucleotide Interval Patterns
43	166	A quasi-clique mining algorithm for analysis of the human protein-protein interaction network
44	179	A Graphical Model for Football Story Snippet Synthesis from Large Scale Commentary
45	184	An efficient approach for mining frequent subgraphs
46	188	An Adaptive i-vector Extraction for Speaker Verification with Short Utterance
47	191	Adversarial Optimization of Indoor Positioning System using Differential Evolution
48	193	Two-Stream Convolutional Network with Multi-level Feature Fusion for Categorization of Human Action from Videos
49	200	Object Segmentation in Texture Images using Texture Gradient based Active Contours
50	201	Prediction of Thyroid Cancer genes using an ensemble of Post Translational Modification, Semantic and Structural similarity based clustering results
51	203	Learning Deep Representations for Place Recognition in SLAM
52	209	Abnormal Crowd Behavior Detection Based on Combined Approach of Energy Model and Threshold
53	212	Spoken Keyword Retrieval using Source and System Features

54	215	Unsupervised Feature Descriptors based Facial Tracking over Distributed Geospatial Subspaces
55	223	Fast Convergence to Near Optimal Solution for Job Shop Scheduling using Cat Swarm Optimization
56	226	Kernel Entropy Discriminant Analysis for Dimension Reduction
57	228	Face detection based on frequency domain features
58	229	Performance of Deep Learning Algorithms vs. Shallow models, in extreme conditions - some empirical studies
59	230	Novel Gammatone Filterbank Based Spectro-Temporal Features for Robust Phoneme Recognition
60	232	A Method for Semantic Relatedness based Query Focused Text Summarization
61	233	Image Annotation using Latent Components and Transmedia Association
62	234	Adaptive TerraSAR-X Image Registration (AIR) using Spatial Fisher Kernel Framework
63	238	Analysis of Features and Metrics for Alignment in Text-Dependent Voice Conversion
64	240	A Study on the Properties of 3D Digital Straight Line Segments
65	244	Incremental learning of Non Stationary Temporal Causal Networks for Telecommunication Domain
66	246	Effectiveness of Mel Scale-Based ESA-IFCC Features for Classification of Natural vs. Spoofed Speech
67	247	Unlocking the Mechanism of Devanagari Letter Identification using Eye Tracking
68	248	Video Stabilization using Sliding Frame Window
69	252	Concept-Based Approach for Research Paper Recommendation
70	257	Rough set rules determine disease progressions in different groups of Parkinson's patients
71	258	Palmprint and Finger Knuckle based Person Authentication with Random Forest via Kernel-2DPCA
72	260	mRMR+: An Effective Feature Selection Algorithm for Classification
73	265	Effectiveness of representation and length variation of shortest paths in graph classification
74	287	Deep Learning in the Domain of Multi-Document Text Summarization
75	298	A Variance Based Image Binarization Scheme and Its Application in Text Segmentation
76	300	Topological Inquisition into the PPI Networks Associated with Human Diseases through Graphlet Frequency Distribution
77	303	A New Method to Address Singularity Problem in Multimodal Data Analysis
78	305	Space-Time Super-Resolution using Deep Learning based Framework
79	309	Analysis of Causal Interactions and Predictive Modelling of Financial Markets Using Econometric Methods, Maximal Overlap Discrete Wavelet
80	311	A Matrix Factorization & Clustering based Approach for Transfer Learning

81	312	Music-Induced Emotion Classification from the Prefrontal Hemodynamics
82	313	A spatio-temporal feature learning approach for Dynamic Scene Recognition
83	316	Novel Phase Encoded Mel filterbank Energies for Environmental Sound Classification
84	318	Machine Learning Approach for Identification of miRNA-mRNA Regulatory Modules in Ovarian Cancer
85	323	An Efficient Encoding Scheme for Dynamic Multidimensional Datasets
