

INDIAN STATISTICAL INSTITUTE

Admission Test 2020

IMPORTANT NOTIFICATION FOR APPLICANTS FOR THE M.TECH. PROGRAMME IN COMPUTER SCIENCE (CS)

From the Academic Year 2020-21, the Indian Statistical Institute will implement a revised curriculum for its M.Tech. programme in Computer Science (CS). Under this revised curriculum, every student admitted to the programme from 2020 onwards will be assigned to one of two streams – the CS-stream or the non-CS stream – as follows:

A student will be assigned to the CS-stream if he/she has

- answered the Computer Science part in the written test PCB as a part of the Admission Test, OR
- obtained waiver from written tests for admission on the basis of a valid GATE score in *Computer Science and Information Technology*, which is above a pre-announced threshold as decided by the admission committee.

All other students will be assigned to the non-CS stream.

The syllabi for the two streams are different. Each student will be required to follow the curriculum specific to his/her stream. Details of the curriculum can be found in the document <https://www.isical.ac.in/~deanweb/MTECHCSNEWSYLL2020.pdf>.
