

## **Installation Guide for IBM SPSS Statistics 26.0 and IBM SPSS AMOS 26.0**

The licenses for IBM SPSS Statistics 26.0 (10 users) and IBM SPSS AMOS 26.0 (single user) have now been configured in the server at CSSC. These licenses can be accessed by installing the appropriate version of the software depending on the Operating System, following the respective steps given below. The installation files are available in the Download section of CSSC website:

[https://www.isical.ac.in/~cssc/?page\\_id=28](https://www.isical.ac.in/~cssc/?page_id=28)

### **For IBM SPSS 26.0 on Windows Operating System:**

1. Run the .exe file downloaded from the above link and complete the installation process.
2. Launch the license configuration wizard, choose the concurrent user license option and give the IP address : **192.168.143.135**
3. After the licensing is successful, your SPSS Software is ready to use.

### **For IBM SPSS AMOS 26.0 on Windows Operating System:**

1. Run the .exe file downloaded from the above link and complete the installation process.
2. Launch the license configuration wizard, choose the concurrent user license option and give the IP address : **192.168.146.21**
3. After the licensing is successful, your SPSS AMOS Software is ready to use.

### **For IBM SPSS 26.0 on Linux Operating System:**

1. Locate the SPSS installation file downloaded from the above link. Use the 'cd' command in the terminal to get to the folder containing the installation file (for e.g. cd Downloads/).
2. Issue the following command to launch the installation wizard and complete the installation process through the application window that opens: **sudo sh SPSSv26 linux.bin**  
**(note down the installation folder that shows up during installation)**  
Once the installation is complete, continue to the license configuration wizard.
3. In the license configuration wizard, choose the concurrent user license option and give the IP address : **192.168.143.135**
4. After the licensing is successful, your SPSS Software is ready to use.
5. Locate and get into the installation folder as noted in Step 2 and launch SPSS by issuing the command: **./stats**

### **For IBM SPSS 26.0 on MAC Operating System:**

1. Locate the SPSS installation file downloaded from the above link.
2. Run the .dmg file and finish the installation process.
3. Once the installation is complete, continue to the license configuration wizard.
4. In the license configuration wizard, choose the concurrent user license option and give the IP address : **192.168.143.135**
5. After the licensing is successful, your SPSS Software is ready to use.

In case of any issues in the installation process, please contact us at [csscservice@isical.ac.in](mailto:csscservice@isical.ac.in).

Thank You!
