

LIST OF PUBLICATIONS OF B. N. MANDAL

RESEARCH PAPERS

1. Reflection of pulses by a parabolic cylinder, Mandal, B.N., *J. Tech.* **13** (1968) 71-77.
2. An integral transform associated with degree of Legendre function, Mandal, B.N., *Bull. Cal. Math. Soc.*, **63** (1971) 1-6.
3. Note on an integral transform, Mandal, B.N., *Bull. Math. de la Soc. Sci. Math. de La R.S. de Roumanie* , **15**(63) (1971) 87-93.
4. Diffraction of waves by a two-part sphere, Mandal, B.N., *Indian J. pure appl. Math.*, **4** (1973) 533-544.
5. Solution of dual integral equations associated with vibration, Mandal, B.N., *J. Tech.*, **19** (1974) 39-46.
6. Torsion of a paraboloid of revolution with mixed boundary conditions, Mandal, B.N., *Bull. Cal. Math. Soc.*, **68** (1976) 225-232.
7. Torsional vibration of a prolate spheroid inducted by a hyperboloid of two sheets, Mandal, B.N., *Bull. Cal. Math. Soc.*, **71** (1979) 196-202.
8. Some basic singularities in the theory of internal waves in a two-fluid medium in the presence of surface tension, Mandal, B.N., *J. Tech.*, **26** (1981) 11-22.
9. Singularities in a two-fluid medium, Chakrabarti, R.N. and Mandal, B.N., *Internat. J. Math. & Math. Sci.*, **6** (1983) 737 - 754.
10. A note on a singular integral equation, Mandal, B.N. and Goswami, S.K., *Indian J. pure appl. Math.*, **14** (1983) 1352 - 1356.
11. Scattering of surface waves by a submerged circular cylinder in a fluid of finite depth, Mandal, B.N. and Chakrabarti, R.N., *J. Indian Inst. Sci.*, **64** (1983) 189-198.
12. Singularities in a two-fluid medium with surface tension at the free surface and at the surface of separation, Mandal, B.N. and Chakrabarti, R.N., *J. Tech.*, **29** (1983) 1-21.
13. A note on the diffraction of an obliquely incident surface wave by a partially immersed fixed vertical barrier, Mandal, B.N. and Goswami, S.K., *Appl. Sci. Res.*, **40** (1983) 345-353.
14. The scattering of an obliquely incident surface wave by a submerged fixed vertical plate, Mandal, B.N. and Goswami, S.K., *J. Math. Phys.*, **25** (1984) 1780-1783.
15. Scattering of surface waves obliquely incident on fixed a half immersed circular cylinder, Mandal, B.N. and Goswami, S.K., *Math. Proc. Camb. Phil. Soc.*, **96** (1984) 359 - 369.
16. A note on the scattering of surface waves obliquely incident on a submerged fixed vertical barrier, Mandal, B.N. and Goswami, S.K., *J. Physical Soc. Japan*, **53** (1984) 2980 - 2987.
17. Singularities in a three-layered fluid medium, Mandal, B.N. and Chakrabarti, R.N., *J. Indian Inst. Sci.*, **65** (1984) 223-243.

18. Scattering of surface waves by a half immersed circular cylinder in fluid of finite depth, Mandal, B.N. and Goswami, S.K., *Internat. J. Math. & Math. Sci.*, **8** (1985) 113-125.
19. A note on the scattering of water waves by a submerged vertical barrier in the presence of surface tension, Mandal, B.N. and Goswami, S.K., *Proc. Indian Natn. Sci. Acad.*, **51 A** (1985) 689-695.
20. A note on a queuing model with arrival rate depending upon the nature of service, Mandal, B.N. and Kundu, Krishna, *Indian J. pure appl. Math.* **16** (1985) 843-852.
21. A note on the scattering of surface waves by a submerged fixed vertical plate, Mandal, B.N. and Goswami, S.K., *J. Tech.*, **32** (1985) 1-7.
22. Two-dimensional source potentials in a two-fluid medium for the modified Helmholtz's equation, Mandal, B.N. and Chakrabarti, R.N., *Internat. J. Math. & Math. Sci.*, **9** (1986) 175-184.
23. A note on the singularities in the theory of water waves with an inertial surface, Mandal, B.N. and Kundu, Krishna, *J. Austral. Math. Soc. Ser. B*, **28** (1986) 271-278.
24. A note on the two-dimensional source potentials in a two-fluid medium, Mandal, B.N. and Chakrabarti, R.N., *Int. J. Math. Educ. Sci. Technol.*, **17** (1986) 632-636.
25. Singular integral equation of the first kind with a Cauchy kernel - Revisited, Mandal, B.N., *Indian J. pure appl. Math.*, **17** (1986) 1340-1344.
26. Ring source potential in a liquid with an inertial surface, Mandal, B.N., *Mech. Res. Comm.*, **13** (1986) 335-339.
27. Fundamental singularities in the theory of water waves with an inertial surface in the presence of surface tension, Mandal, B.N. and Kundu, Krishna, *Indian J. pure appl. Math.*, **18** (1987) 83-90.
28. A note on construction of potentials due to line multipoles in the theory of water waves, Mandal, B.N., *Int. J. Math. Educ. Sci. Technol.*, **18** (1987) 561-565.
29. A note on an integral equation in the theory of water waves, Mandal, B.N. and Kundu, P.K., *Bull. Cal. Math. Soc.*, **79** (1987) 139-141.
30. Scattering of water waves by vertical barriers and associated mathematical methods, Mandal, B.N. and Kundu, P.K., *Proc. Indian Natn. Sci. Acad.*, **53 A** (1987) 514-530.
31. A plane vertical submerged barrier in surface water waves, Basu, U. and Mandal, B.N., *Internat. J. Math. & Math. Sci.*, **10** (1987) 815-820.
32. A note on the diffraction of water waves by a vertical wall with a narrow gap, Mandal, B.N., *Arch. Mech.*, **39** (1987) 269-273.
33. Potential due to a horizontal ring of wave sources in the theory of water waves, Mandal, B.N. and Chakrabarti, R.N., *Proc. Indian Natn. Sci. Acad.*, **53 A** (1987) 775-785.
34. Transmission of obliquely incident water waves through small apertures, Mandal, B.N., *Proc. Int. Conf. Fluid Mech. ed. Qiu shuqing, pub. by Peking Univ. Press, (1987) Beijing, China*, 513-516.
35. Ring source potentials in a fluid with an inertial surface in the presence of surface tension, Mandal, B.N. and Kundu, Krishna, *Int. J. Engng. Sci.*, **25** (1987) 1383-1386.
36. Singular integral equation of first kind with a Cauchy kernel, Mandal, B.N., *Bull. Cal. Math. Soc. Festschrift for M. Dutta* (1987) 145-148.

37. Water waves generated by disturbance at an inertial surface, Mandal, B.N., *Appl. Sci. Res.*, **45** (1988) 67-73.
38. On forced motion due to a vertical cylindrical wavemaker in a liquid with an inertial surface, Mandal, B.N., *Bull. Cal. Math. Soc.*, **80** (1988) 65-72.
39. Ring source potentials in two superposed fluids separated by an inertial surface, Mandal, B.N. and Kundu, Krishna, *Internat. J. Math. & Math. Sci.*, **11** (1988) 535-542.
40. A note on Bessel function dual integral equation with weight function, Mandal, B.N., *Internat. J. Math. & Math. Sci.*, **11** (1988) 543-550.
41. A note on the evaluation of reflection coefficients in the scattering of water waves by fixed vertical barriers, Mandal, B.N., *Int. J. Math. Educ. Sci. Technol.*, **19** (1988) 581-585.
42. Ring source potential outside a vertical co-axial circular cylinder immersed in a liquid with an inertial surface, Mandal, B.N. and Kundu, Krishna, *J. Indian Inst. Sci.*, **68** (1988) 261-267.
43. The plane vertical wave maker problem - Revisited, Mandal, B.N. and Chakrabarti, A., *Appl. Math. Lett.*, **1** (1988) 255-258.
44. A note on Havelock's generalisation of Fourier Cosine expansion, Mandal, B.N., *Int. J. Math. Educ. Sci. Technol.*, **20** (1989) 179-181.
45. A note on the cylindrical wavemaker problem in a liquid with an inertial surface, Mandal, B.N. and Kundu, Krishna, *Int. J. Engng. Sci.*, **27** (1989) 393-398.
46. A cylindrical wavemaker in liquid of finite depth with an inertial surface, Mandal, B.N. and Kundu, Krishna, *Indian J. pure appl. Math.*, **20** (1989) 505-512.
47. An inventory model for deteriorating items and stock-dependent consumption rate, Mandal, B.N. and Phaujdar, S., *J. Opl. Res. Soc.*, **40** (1989) 483-488.
48. A note on an inventory model with stock-dependent consumption rate, Mandal, B.N. and Phaujdar, S., *OPSEARCH*, **26** (1989) 43-46.
49. Incoming water waves against a vertical cliff in an ocean, Mandal, B.N. and Kundu, P.K., *Proc. Indian natn. Sci. Acad.*, **55 A** (1989) 643-654.
50. A note on diffraction of water waves by a nearly vertical barrier, Mandal, B.N. and Chakrabarti, A., *IMA J. Appl. Math.*, **43** (1989) 157-165.
51. Water waves generated at an inertial surface by an axisymmetric initial surface disturbance, Mandal, B.N. and Mukherjee, S., *Int. J. Math. Educ. Sci. Technol.*, **20** (1989) 743-747.
52. Some EOQ models under permissible delay in payments, Mandal, B.N. and Phaujdar, S., *Int. J. Mgmt. and Systems*, **5** (1989) 99-108.
53. Transmission of obliquely incident surface waves through a narrow gap, Mandal, B.N. and Kundu, P.K., *Internat. J. Math. & Math. Sci.*, **12** (1989) 741-748.
54. A note on Havelock's cylindrical wavemaker problem, Mandal, B.N., *Rev. Roum. Sci. Techn. -M'ec. Appl.*, **34** (1989) 185-190.
55. Waves generated by disturbances at an inertial surface in an ocean of finite depth, Mandal, B.N. and Ghosh, N.K., *Proc. Indian Natn. Sci. Acad.*, **55 A** (1989) 906-911.

56. Incoming water waves against a vertical cliff, Mandal, B.N. and Kundu, P.K., *Appl. Math. Lett.*, **3** (1990) 33-36.
57. Generations of waves at an inertial surface due to explosions, Mandal, B.N. and Ghosh, N.K., *Internat. J. Math. & Math. Sci.*, **13** (1990) 599-606.
58. A note on the reflection coefficient in a water wave scattering problem, Mandal, B.N. and Kundu, P.K., *Appl. Math. Lett.*, **3** (1990) 5-7.
59. A porous wavemaker in a liquid of infinite depth with an inertial surface, Mandal, B.N. and Kundu, Krishna, *Proc. Seminar in Techniques in Applied Mathematics and Applications, B.E. College*, (1990) 167-171.
60. Scattering of water waves by a submerged nearly vertical plate, Mandal, B.N. and Kundu, P.K., *SIAM J. Appl. Math.*, **50** (1990) 1221-1231.
61. Generation of water waves due to an arbitrary periodic surface pressure at an inertial surface in an ocean of finite depth, Mandal, B.N. and Ghosh, N.K., *Proc. Indian Natn. Sci. Acad.*, **56 A** (1990) 521-531.
62. A note on oblique water wave diffraction by a cylindrical deformation of the bottom in the presence of surface tension, Mandal, B.N. and Basu, U., *Arch. Mech.*, **42** (1990) 723-727.
63. A note on the transmission of oblique waves through small apertures, Mandal, B.N. and Kundu, P.K., *Computers Math. Applic.*, **21** (1991) 17-22.
64. On waves due to small oscillations of a vertical plate submerged in deep water, Mandal, B.N., *J. Austral. Math. Soc. Ser. B*, **32** (1991) 296-303.
65. A note on waves due to rolling of a partially immersed nearly vertical plate, Mandal, B.N. and Banerjee, S., *SIAM J. Appl. Math.*, **51** (1991) 930-939.
66. A note on the reflection coefficient for a class of water wave scattering problems, Mandal, B.N., *Appl. Math. Lett.*, **4(2)** (1991) 49-52.
67. A note on an inventory model with different demand rates during stock-in and stock-out period, Mandal, B.N. and Ghosh, A.K., *Int. J. Mgmt. and Systems*, **7** (1991) 33-36.
68. Ring source potential outside a vertical coaxial circular cylinder in a liquid of finite depth with an inertial surface, Mandal, B.N. and Ghosh, N.K., *Int. J. Engng. Sci.*, **29** (1991) 663-667.
69. A note on the plane vertical wavemaker in the presence of surface tension, Mandal, B.N. and Bandyopadhyay, S., *Quart. Appl. Math.*, **49** (1991) 627-633.
70. A note on the cylindrical wavemaker problem in the presence of surface tension, Mandal, B.N. and Ghosh, N.K., *Mech. Res. Comm.*, **18** (1991) 221-225.
71. A Mehler-Fock type integral transform, Mandal, B.N. and Guha Roy, Pallabi, *Appl. Math. Lett.*, **4(4)** (1991) 29-32.
72. Diffraction of water waves by a deformation of the bottom, Basu, U. and Mandal, B.N., *Indian J. pure appl. Math.*, **22** (1991) 781-786.
73. Solution of a boundary value problem associated with diffraction of water waves by a partially immersed nearly vertical barrier, Mandal, B.N. and Banerjee, S., *Z. Angew. Math. Mech.*, **72** (1992) 517-519.
74. Surface water waves due to an oscillatory wavemaker in the presence of surface tension, Mandal, B.N. and Banerjee, S., *Internat. J. Math. & Math. Sci.*, **15** (1992) 399-404.

75. Generation of water waves by an oscillating line source in the presence of a nearly vertical cliff, Mandal, B.N. and Kundu, P.K., *Proc. Indian Natn. Sci. Acad.*, **58 A** (1992) 83-94.
76. A note on dual integral equations involving Associated Legendre function, Mandal, B.N., *Internat. J. Math. & Math. Sci.*, **15** (1992) 601-604.
77. A note on a pre-emptive priority queue, Mandal, B.N. and Ghosh, A.K., *Pure Appl. Math. Sci.*, **35** (1992) 143-149.
78. On waves due to rolling of a submerged nearly vertical plate, Mandal, B.N. and Banerjea, Sudeshna, *Int. J. Engng. Sci.*, **30** (1992) 341-347.
79. On forced capillary gravity waves at the interface between two superposed fluids due to a plane vertical wavemaker, Mandal, B.N. and Banerjea, Sudeshna, *Mech. Res. Comm.*, **19** (1992) 167-172.
80. Solution of an integral equation arising in the theory of water waves, Mandal, B.N. and Banerjea, Sudeshna, *Proc. Int. Conf. on Theory of Diff. Eqns. and Applic. to Oceanography, 17-21 Dec. 1990, Affiliated East West Publishing Co., New Delhi, ed. by S.G. Deo & Y.S. Prahalad*, (1992) 92-104.
81. Reflection of water waves by a nearly vertical wall, Mandal, B.N. and Kar, S.K., *Int. J. Math. Educ. Sci. Tech.*, **23** (1992) 665-670.
82. A note on the explicit solution to a class of Fredholm integral equations, Mandal, B.N. and Chakraborti, A., *Bull. Cal. Math. Soc.*, **84** (1992) 419-425.
83. On waves due to rolling of a vertical plate, Banerjea, Sudeshna, and Mandal, B.N., *Indian J. pure appl. Math.*, **23** (1992) 753-761.
84. On forced motion due to a vertical cylindrical wavemaker in two superposed fluids, Basu, Uma and Mandal, B.N., *Rev. Roum. Sci. Techn. -M'ec. Appl.*, **37** (1992) 397-400.
85. The expansion method of solution to the problem of water wave diffraction by a submerged nearly vertical plate, Mandal, B.N. and Banerjea, Sudeshna, *Ind. J. Theo. Phys.*, **40** (1992) 23-38.
86. Integral representation of a function in terms of associated Legendre functions, Mandal, Nanigopal and Mandal, B.N., *BULL. MATH. de la Soc. Sci. Math. de Roumanie, Tome* **36** (84) (1992) 155-161.
87. Waves due to a line source in the presence of small bottom deformation, Mandal, B.N. and Basu, Uma, *Int. J. Engng. Sci.*, **31** (1993) 71-75.
88. On the Green's function method for the Sommerfield half-plane diffraction problem, Mandal, B.N. and Chakrabarti, A., *Bull. Cal. Math. Soc.*, **85** (1993) 145-152.
89. Integral expansions related to Mehler-Fok type transforms, Mandal, Nanigopal and Mandal, B.N., *Appl. Math. Lett.*, **6**(1) (1993) 17-20.
90. Solution of a singular integral equation in double interval arising in the theory of water waves, Banerjea, Sudeshna and Mandal, B.N., *Appl. Math. Lett.*, **6** No. 3 (1993) 81-84.
91. Solution of a boundary value problem associated with diffraction of water waves by a submerged nearly vertical barrier, Mandal, B.N. and Banerjea, Sudeshna, *Bull. Cal. Math. Soc.*, **85** (1993) 209-214.
92. Forced motion in water due to a nearly cylindrical wavemaker, Dolai, D.P. and Mandal, B.N., *Int. J. Math. Educ. Sci. Technol.*, **24** (1993) 595-601.
93. On forced motion in water due to a nearly vertical wavemaker, Dolai, D.P. and Mandal, B.N., *Mech. Res. Comm.*, **20** (1993) 381-390.

94. Diffraction of interface waves by a bottom deformation, Mandal, B.N. and Basu, U., *Arch. Mech.*, **45** (1993) 271-277.
95. On inventory models for a linear trend in demand, Mandal, B.N. and Phaujdar, S., *Int. J. Mgmt. Systems*, **9** (1993) 161-166.
96. Surface water waves due to rolling oscillations of a nearly vertical plate, Mandal, B.N. and Banerjea, Sudeshna, *Rev. Roum. Sci. Techn. -M'ec. Appl.*, **38** (1993) 651-657.
97. On some dual integral equations involving Legendre and associated Legendre functions, Mandal, Nanigopal and Mandal, B.N., *J. Indian Inst. Sci.*, **73** (1993) 565-578.
98. Solution of the problem of scattering of water waves by a nearly vertical plate, Vijayabharathi, L., Chakrabarti, A., Mandal, B.N. and Banerjea, S., *J. Austral. Math. Soc., Ser. B* **35** (1994) 382-395.
99. Expansion of a class of functions into an integral involving associated Legendre functions, Mandal, Nanigopal and Mandal, B.N., *Internat. J. Math. & Math. Sci.*, **17** (1994) 293-300.
100. Scattering of water waves by a submerged nearly circular cylinder, Mandal, B.N. and Banerjea, Sudeshna, *J. Austral. Math. Soc., Ser. B* **36** (1994) 372-380.
101. Some radiation and diffraction problems in the linearised theory of water waves, Mandal, B.N. and Banerjea, Sudeshna, *Ocean Waves Engineering, International Series on Advances in Fluid Mechanics, ed. by Rahman, Computational Mechanics Publications, Southampton, U.K.* (1994) 81-114.
102. Oblique water wave diffraction by thin vertical barriers in water of uniform finite depth, Mandal, B.N. and Dolai, D.P., *Appl. Ocean Res.*, **16** (1994) 195-203.
103. Oblique interface wave diffraction by a small bottom deformation in the presence of interfacial tension, Mandal, B.N. and Basu, Uma, *Rev. Roum. Sci. Techn. -M'ec. Appl.*, **39** (1994) 525-531.
104. Interface waves due to a vertical cylindrical wavemaker in the presence of interfacial tension, Dolai, D.P. and Mandal, B.N., *Rev. Roum. Sci. Techn. -M'ec. Appl.*, **39** (1994) 659-665.
105. On a singular integral equation with logarithmic and Cauchy kernel, Banerjea, Sudeshna and Mandal, B.N., *Int. J. Math. Educ. Sci. Technol.*, **26** (1995) 279-283.
106. Oblique interface waves against a nearly vertical cliff in two superposed fluids, Dolai, D.P. and Mandal, B.N., *Proc. Indian natn. Sci. Acad., pt. A* **61** (1995) 53-72.
107. Interface wave diffraction by a thin vertical barrier submerged in lower fluid, Mandal, B.N., Banerjea, Sudeshna and Dolai, D.P., *Appl. Ocean Res.*, **17** (1995) 93-102.
108. Potential due to a horizontal ring of wave sources in a two-fluid medium, Mandal, B.N. and Chakrabarti, R.N., *Proc. Indian natn. Sci. Acad., Pt. A* **61** (1995) 433-439.
109. Solution of a class of mixed boundary value problems for Laplace's equation arising in water wave scattering, Chakrabarti, A., Banerjea, S., Mandal, B.N. and Sahoo, T., *J. Indian Inst. Sci.*, **75** (1995) 577-585.
110. Ordering policy for decaying inventory with shortages under price-dependent demand, Mandal, B.N. and Ghosh, A.K., *Int. J. Mgmt. & Systems.*, **12** (1996) 1-10.
111. A note on dual integral equations involving associated Weber-Orr transforms, Mandal, Nanigopal and Mandal, B.N., *Internat. J. Math. & Math. Sci.*, **19** (1996) 161-170.

112. Oblique interface wave diffraction by a small bottom deformation in two superposed fluids, Mandal, B.N. and Basu, U., *Internat. J. Math. & Math. Sci.*, **19** (1996) 363-370.
113. Oblique diffraction of surface waves by a submerged vertical plate, Mandal, B.N. and Das, Pulak, *J. Engng. Math.*, **30**(1996) 459-470.
114. Oblique wave diffraction by two parallel vertical barriers with submerged gaps in water of uniform finite depth, Kanoria, Mridula and Mandal, B.N., *J. Tech. Phys.*, **37** (1996) 187-204.
115. On waves due to rolling of a ship in water of finite depth, Banerjea, Sudeshna, Dolai, D.P. and Mandal, B.N., *Archiv. Appl. Mech.*, **67** (1996) 35-45.
116. Interface wave diffraction by a plate submerged in lower fluid, Dolai, D.P. & Mandal, B.N., *Bull. Cal. Math. Soc.*, **88** (1996) 355-362.
117. Free-surface flow over a small geometrical disturbance at the bottom, Mandal, B.N. & Basu, Uma, *Bull. Cal. Math. Soc.*, **88** (1996) 409-425.
118. Solution of hypersingular integral equation and applications to some water wave problem, Mandal, B.N., *Lecture Notes in Mathematical Sciences*, **4** (1996) *COSIST Programme in Mathematics, Jadavpur University, Calcutta*, 1-58.
119. Solution of a system of generalized Abel integral equations using fractional calculus, Mandal, N., Chakrabarti, A. and Mandal, B.N., *Appl. Math. Lett.*, **9** (1996) 1-4.
120. Scattering of oblique waves by a thin vertical wall with a submerged gap, Das, P., Banerjea, S. and Mandal, B.N., *Arch. Mech.*, **48** (1996) 959-972.
121. Oblique wave scattering by a submerged thin wall with gap in finite-depth water, Banerjea, S., Kanoria, M., Dolai, D.P. and Mandal, B.N., *Applied Ocean Research*, **18** (1996) 319-327.
122. On a singular integral equation and its use to some barrier problems, Mandal, B.N. and Banerjea, Sudeshna, *Mathematical Techniques for water waves, International Series on Advances in Fluid Mechanics, Vol 8*, ed by B. N. Mandal, *Computational Mechanics Publications, Southampton, U.K.* (1997) 255-283.
123. On waves due to rolling oscillation of a submerged plate, Kanoria, Mridula and Mandal, B.N., *J. Tech. Phys.*, **38** (1997) 111-120.
124. On waves due to rolling of a plate submerged in finite depth water, Banerjea, Sudeshna, Dolai, D.P., Mandal, B.N., *Appl. Mech. & Engng.*, **2** (1997) 285-297.
125. Solution of a class of hypersingular integral equations of the second kind, Chakrabarti, A., Mandal, B.N., Basu, U. and Banerjea, S. *ZAMM*, **77** (1997) 319-320.
126. The rolling ship problem -Revisited, Mandal, B.N., Banerjea, Sudeshna and Kanoria, Mridula, *Mathematical and Computer Modelling*, **25** (1997) 11-18.
127. A unified approach to problems of scattering of surface water waves by vertical barriers, Chakrabarti, A., Banerjea, Sudeshna, Mandal, B.N. and Sahoo, T., *J. Austral. Math. Soc. Ser B*, **39** (1997) 93-103.
128. Interface waves due to a plane vertical wavemaker in the presence of interfacial tension, Dolai, D. P. and Mandal, B. N., *J. Tech.*, **34** (1997) 79-89.
129. Water wave scattering by a thick wall with a gap in finite depth water, Mandal, B. N., *Review Bull. Cal. Math. soc.*, **5** (1997) 87-94.

130. Oblique water wave diffraction by two parallel thin barriers with gaps, Das, Pulak, Dolai, D.P. & Mandal, B.N., *J. Wtry Port Coast Ocean Engg.* **123** (1997) 163-171.
131. On forced motion due to a wavemaker in a stratified fluid, Basu, U. Dolai, D. P. and Mandal, B. N., *Bull. Cal. Math. Soc.*, **89** (1997) 397-410.
132. Water wave scattering by barriers in finite depth water, Mandal B. N., *Lecture Notes in Mathematical Sciences, Vol 5, UGC-DSA Programme, Jadavpur University* (1997) 45-55.
133. Water wave scattering by a thick vertical wall with a gap in finite depth water, by Mandal B. N. and Kanoria M., *Indian J. Th. Phys.*, **45** (1997) 45-56.
134. Scattering of water waves by a submerged thin vertical wall with a gap, Banerjea, S. and Mandal, B.N., *J.Austral. Math Soc. ser B.*, **39**(1998) 318-331.
135. Derivation of the solution of a simple hypersingular integral equation, by Chakrabarti A. and Manadal, B. N. *Int. J. Math. Educ. Sci. Technol.*, **29** (1998) 47-53.
136. A pulsating line source in the presence of a nearly circular cylinder submerged in deep water, Mandal, B. N. and Basu, U., *Mech. Res. Comm.*, **25** (1998) 599-604.
137. Generation of waves at an inertial surface, Ghosh, P., and Mandal, B. N., *J. Appl. Mech. and Engng.*, **4** (1999) 73-96.
138. The Wiener-Hopf solution of a class of mixed boundary value problems arising in surface water wave phenomena, Kanoria, M., Mandal, B. N. and Chakrabarti, A., *Wave Motion*, **29** (1999) 267-292.
139. Water wave scattering by thick vertical barriers, Kanoria, M., Dolai, D. P. and Mandal, B. N., *J. Engng. Math.*, **35** (1999) 361-384.
140. On Galerkin's method applicable to the problems of water wave scattering by barriers, Mandal, B. N. and Chakrabarti, A., *Proc. Indian Natn. Sci. Acad. A, Phys. Sci.*, **65 A** (1999) 61-71.
141. Second-order wave diffraction by thin vertical barrier in deep water, M. Kanoria and B. N. Mandal, *proc. Fourteenth International Workshop on Water Waves and Floating Bodies, university of Michigan, USA, 11-14 April* (1999) 64-67.
142. Oblique wave scattering by thick barriers, Mandal B. N. and Kanoria, M., *J. Offshore Mechanics and Arctic Engng*, **182** (2000) 100-108, July 98, Lisbon.
143. Waves due to initial disturbances at the inertial surface in a stratified fluid of finite depth, by Ghosh, P. Basu, U. and Mandal, B. N., *Int. J. Math. and Math. Sci.*, **24** (2000) 265-276.
144. On approximate evaluation of infinite integrals involving two parameters, M. Kanoria, Chakrabarti A. and Mandal B. N., *Indian J. pure & Appl. Math.*, **31** (2000) 1211-1220.
145. Integral equations and applications to water wave scattering problems, Mandal B. N., *Proceedings of the international Conference on Geometry, Analysis and Applications, Benaras Hindu University, 21-24 2000 ed. R. S. Pathak, World Scientific, Singapore* (2001) 389-404.
146. Water waves scattering by inclined barrier submerged in finite depth water, Kanoria M. and Mandal B. N., *proceedings of 16th International workshop on Water Waves and Floating Bodies, ed. K. Mori & H. Iwashita, 22-25 April 2001, Hiroshima, Japan*, 65-68.
147. Scattering of water waves by inclined thin plate submerged in finite depth water, C. Midya, Kanoria M. and Mandal B. N., *Arch. Appl. Mech.*, **71** (2001) 827-840.

148. Use of a perturbation technique in water wave problems, Mandal B. N., *Proceedings of National Conference on Mathematics, Assam Univ. Silchar, 14-16 March 2001*. ed.Som, T. (2002) pp.73-82.
149. Interface wave scattering by an elliptic arc, *Proc. 16 IWWFEB*, Cambridge, UK, ed. Rainy, R.C.T. and Lee, S.F., 14-17 April 2002, pp 69-72.
150. Reflection by slotted thick barriers under oblique wave attack-a numerical study, Mandal B. N. and Kanoria M., *Proceedings of IUTAM Symposium on Diffraction and Scattering in Fluid Mechanics & Elasticity, Manchester, UK, 16-20 July 2000*, ed. Abrahams, I. D., Martin, P. A. & Simon M. J., Kluwer Academic Publ., (2002) 35-49.
151. Water wave scattering by two symmetric circular arc shaped thin plates, Mandal, B. N. and Gayen (Chowdhury), R., *J. Engng. Math.*, **44** (2002) 297-303.
152. Water wave scattering by a submerged circular arc shaped plate, Kanoria, M. and Mandal, B. N., *Fluid Dyn. Res.* **31** (2002) 317-331.
153. Water Waves, Mandal B. N. and Kanoria M., *Cubo Mathematical Educational*, **5** (2003) 273-287.
154. Scattering of water waves by two thin symmetric inclined plates, Mandal, B. N. and Gayen (Chowdhury), R., *18 IWWFEB*, Ecole Centrale de Nantes , France, 6-9 April 2003, eds. Clement, A. H. and Ferrant, P.
155. A generalisation to the hybrid Fourier transform and its application, Mandal, B. N. and Chakrabarti, A., *Appl. Math. Lett.* **16** (2003) 703-708.
156. A waveguide problem involving a thick iris in the theory of electromagnetism, *Indian J pure & appl. Math.* **34** (2003) 859-871.
157. Water wave scattering by two thin symmetric inclined plates submerged in finite depth water, Gayen(Chowdhury), R. and Mandal, B.N., *Int. J. Appl. Mech. & Engng.* **8** (2003) 589-601.
158. Motion due to ring source in ice-covered water, Gayen(Chowdhury), R. and Mandal, B.N., *Int. J. Engng. Sci.* **42** (2004) 1645-1654.
159. Wave diffraction by a small elevation of the bottom of an ocean with an ice-cover, Mandal, B.N. and Basu, Uma, *Arch. Appl. Mech.* **73** (2004) 812-822.
160. Water wave scattering by the two edges of a strip-like ice-cover, Gayen(Chowdhury), R. and Mandal, B.N., *19 IWWFEB* 28-31 March 2004, Cortona, Italy, eds. Campana, E.F. and Iafrati, A.
161. Ring source potential in water with an ice-cover, Mandal, B.N. and Gayen(Chowdhury), R., *Int. J. Math. Sci.* **3** (2004) 203-210.
162. Oblique wave scattering by undulations on the bed of an ice-covered ocean, Mandal, B.N. and Maiti, P., *Arch. Mech.* **56** (2004) 485-493.
163. The classical dock problem – use of integral equations, Mandal, B. N. , Chakrabarti, A. and Gayen (Chowdhury), R., *Int. Symp. In Advances in Fluid Mech.*, Bangalore Univ. 21-22 June 2004, ed. Rudraiah, N. et. al. Tata McGraw Hill , New Delhi, 165-176.
164. Water waves generated by disturbances at an ice-cover, Maiti, P. and Mandal, B. N., *Inernat. J. Math. Math. Sci.* **2005** (2005) 737-746.
165. Water waves generated due to initial axis symmetric disturbances in water with an ice-cover, Maiti, P. and Mandal, B. N., *Arch. Appl. Mech.* **74** (2005) 629-636.

166. Water wave scattering by an ice-strip, Gayen, R., Mandal, B. N. and Chakrabarti, A., *J. Engg. Math.* **53** (2005) 21-37.
167. A note on the solution of the dispersion equation for small-amplitude internal waves, Das, D. and Mandal, B. N., *Arch. Mech.* **57** (2005) 449-457.
168. Water wave scattering by two partially immersed nearly vertical barriers, De, S., Gayen, R. and Mandal, B. N., *Wave Motion* **43** (2005) 167-175.
169. The dock problem revisited, Chakrabarti, A., Mandal, B. N. and Gayen, R., *Internat. J. Math. & Math. Sci.* **2005** (2005) 3459-3470.
170. Motion due to fundamental singularities in finite depth water with an elastic solid cover, Gayen(Chowdhury), R. and Mandal, B. N., *Fluid Dyn. Res.* **38** (2006) 224-240.
171. Oblique wave scattering by a circular cylinder submerged beneath an ice-cover, Das, D. and Mandal, B. N., *Int. J. Engng. Sci.* **44** (2006) 166-179.
172. Oblique wave scattering by a circular cylinder in a two-layer fluid with an ice-cover, Das, P. and Mandal, B. N. , 21 *IWWFEB*, Loughborough Univ., 2-5 April 2006, ed. Linton, C. M., McIver, M. and McIver, M., pp 29-32.
173. Water wave scattering by two submerged nearly vertical barriers, Mandal, B. N. and De, S., *ANZIAM J* **48** (2006)107-118.
174. Approximate solution of a class of hypersingular integral equations, Mandal, B. N. and Bera, G. H., *Appl. Math. Lett.* **19** (2006)1286-1290.
175. Scattering of oblique waves by bottom undulations in a two-layer fluid, Maiti, P. and Mandal, B. N., *J. Appl. Math. & Computing* **22** (2006) 21-39.
176. Water wave scattering by bottom undulations in the presence of a thin partially immersed barrier, Mandal, B. N. and Gayen, R., *Appl. Ocean Res* **28** (2006) 113-119.
177. Water wave scattering by two sharp discontinuities in the surface boundary conditions, Rupanwita Gayen (Chowdhury), B. N. Mandal and A. Chakrabarti, *IMA J Appl Math.***71** (2006) 811-831.
178. Water wave diffraction by a surface strip, Gayen, R., Mandal, B. N. and Chakrabarti, A., *J. Fluid Mech.* **571** (2007) 419-432.
179. Integral Transform, Mandal, B. N., *Techniques in Applied Mathematics*, ed. U. Basu and B. N. Mandal, Narosa Publishing House, New Delhi, (2007) 132-154.
180. Scattering of internal waves in a stratified fluid by the edge of an inertial surface, Dolai, Prity and Mandal, B. N., *Bull. Cal. Math. Soc.* **99**(2007) 5-20.
181. Water wave scattering by two partially immersed barriers – an alternative method of solution, De, S. and Mandal, B. N., 22 *IWWFEB*, Plitvice, Croatia, eds. Malencia, S. and Senjanovic, I., 15-18 April 2007, pp53-56.
182. Approximate solution of a class of singular integral equations of second kind, Mandal, B. N. and Bera, G. H., *J. Comput. Appl. Math.*, **206** (2007)189-195.
183. Waves generated by bottom disturbance in an ice-covered ocean, Paramita Maiti and B. N. Mandal, *Int. J. Appl. Mech & Engg.* **12** (2007) 477- 486.
184. Numerical solution of some classes of integral equations using Bernstein polynomials, Mandal, B. N. and Bhattacharya, Subhra, *Appl. Math and Computation* **190** (2007) 1707-1716.

185. Wave scattering by a horizontal circular cylinder in a two-layer fluid with an ice-cover, Das, Dilip and Mandal, B. N., *Int. J. Engng. Sci.* **45** (2007) 842-872.
186. Water wave scattering by bottom undulations in the presence of a thin submerged vertical plate, Mandal, B. N. and De, Soumen, *Int. J. Appl. Math. & Engng. Sci.* **1**. no.2 (2007) 193 – 205.
187. A class of dual integral equations, Bera, G. H. and Mandal, B. N., *Bull. Cal. Math. Soc.* **99** (2007) 557 – 566.
188. Numerical solution of a singular integro-differential equation, Bhattacharya, Subhra and Mandal, B. N., *Appl. Math. and Computation* **195** (2008) 346-350.
189. Energy identities in water wave theory for free-surface boundary condition with higher-order derivatives, Das, Dilip, Mandal, B. N. and Chakrabarti, A., *Fluid Dyn. Res.* **40** (2008) 253- 272.
190. Water wave radiation by a sphere submerged in water with an ice-cover, Das, Dilip and Mandal, B. N., *Arch. Appl. Mech.* **78** (2008) 649 – 661.
191. Numerical solution of integral equations, Mandal, B. N., *Applied Mathematics*, eds. Basu, U. and Mandal, B. N., Narosa Publishing House, New Delhi (2008) 143 – 163.
192. Solitary waves KdV equation: Derivation from nonlinear shallow water wave theory, *Applied Mathematics*, eds. Basu, U. and Mandal, B. N., Narosa Publishing House, New Delhi (2008) 164 – 172.
193. Water wave scattering by a circular cylinder submerged in water with an ice-cover, Das, Dilip and Mandal, B. N., *Indian J. pure & Appl. Math.* **39** (2008) 299 - 315.
194. Use of Bernstein polynomials in numerical solutions of Volterra integral equations, Bhattacharya, Subhra and Mandal, B. N., *Appl. Mathematical Sci.* **2** (2008) 1773 – 1787.
195. Oblique wave scattering by a fixed half-immersed circular cylinder in water with an ice-cover, Das, Dilip and Mandal, B. N., *23 IWWFEB*, Jeju, South Korea, 13-16 April, 2008, eds. Choi, H.S. and Kim, Y. pp 29-32.
196. Numerical solution of two special Fredholm integral equations of mathematical physics, Bhattacharya, S. and Mandal, B. N., *Int. J. Appl. Math. & Engng. Sci.* **2** (2008) 117 – 121.
197. Water wave scattering by bottom undulations in an ice-covered two-layer fluid, Maiti, P. and Mandal, B. N., *Appl. Ocean Research.* **30** (2008) 264 - 272
198. Surface wave propagation over small undulations at the bottom of an ocean with surface discontinuity, Mandal, B. N. and De, Soumen, *Geophys. & Astrophys. Fluid Dyn.* **103** (2009) 19 - 30.
199. Wave scattering by a circular cylinder half-immersed in water with an ice-cover, Das, Dilip and Mandal, B. N., *Int. J. Engng. Sci.* **47** (2009) 463 – 474.
200. Scattering of surface water waves by a floating elastic plate in two dimensions, Gayen, Rupanwita and Mandal, B. N., *SIAM J. Appl. Math.* **69** (2009) 1520 – 1541.
201. Water wave scattering by two submerged plane vertical barriers – Abel integral equations approach, De, S., Mandal, B. N. and Chakrabarti, *J. Engng. Math.* **65** (2009) 75 – 87.
202. Wave scattering by undulating bed topography in a two-layer ocean, Maiti, Paramita, Mandal, B. N. and Basu, U., *J. Marine Sci. Applic.* **8** (2009) 183 – 195.
203. Numerical solution of some classes of logarithmically singular integral equations, Bhattacharya, Subhra and Mandal, B. N. *J. Adv. Res. Appl. Math.* **2** (2010) 30-38.

204. Wave radiation by a sphere submerged in a two-layer ocean with an ice-cover, Das, Dilip and Mandal, B. N., *Appl. Ocean Res.* **32** (2010) 358 - 366.
205. Use of Abel integral equations in water wave scattering by two surface-piercing barriers, De, S., Mandal, B. N. and Chakrabarti, A., *Wave Motion* **47** (2010) 279-288.
206. Numerical solution of an integral equation arising in the problem of cruciform crack, Bhattacharya, Subhra and Mandal, B. N., *Int. J. Appl. Math. & Mech.* **6** (2010) 70 – 77.
207. Wave scattering by a thin vertical barrier submerged beneath an ice-cover. Maiti, Paramita and Mandal, B. N., *Appl Ocean Res* **32** (2010) 367 – 373.
208. Construction of wave-free potentials in the linearised theory of water waves, Das, Dilip and Mandal, B. N., *J. Marine Sci. Applic.* **9** (2010) 347-354.
209. Numerical solution of a system of generalized Abel integral equations using Bernstein polynomials. Pandey, R. K. and Mandal, B. N., *J. Adv. Res. Sci. Comput.* **2** (2010) 44 – 53.
210. Construction of wave-free potentials in the linearized theory of water waves in uniform finite depth water, Mandal, B. N. and Das, Dilip, *Rev. Bull. Cal. Math. Soc.* **18** (2010) 171 – 182.
211. Transmission of water waves through apertures in a pair of thin vertical barriers, De, Soumen and Mandal, B. N., 26th IWWF, Athens, Greece, eds. Mavarakos, S.A. and Chatjigeorgiou, I.K., 17 – 20 April 2011, pp 33-36.
212. A note on one-point quadrature formula for Daubechies scale function with partial support, Panja, M. M. and Mandal, B. N. *Appl. Math. and Comput.* **218** (2011) 4147-4151.
213. Evaluation of singular integrals using Daubechies scale functions, Panja, M.M. and Mandal, B. N. *Advances in Comput Math & its Applic* **1** (2012) 64-75.
214. Numerical solution of linear Fredholm and Volterra integral equations of the second kind by using Quadratic Legendre multi-wavelets, Singh, Rajeev Kr., Pathak, Ashish, and Mandal, B. N. , *J. Adv. Res. Sci. Comput* **4** no. 3 (2012) 35-48.
215. An analytical method for solving singular integral equations of Abel type, Koushendra K. Singh, Rajesh K. Pandey, B. N. Mandal and Nikita Dubey, *Procedia Engineering* **38** (2012) 2726-2738. International Conference on Modelling, Optimisation and Computing -2012
216. Oblique wave scattering by a semi-infinite rigid dock in the presence of bottom undulations, Harpreet Dhillon, Sudeshna Banerjea and B N Mandal, *Indian J Pure Appl Math* (2012)
217. The Cauchy Poisson problem for a sloping beach, Chakraborty, Rumpa and Mandal, B. N., *Int. J. Appl. Math & Engng. Sci.* **6** No.2 (2012) 145-163.
218. Water wave scattering by an undulating bottom , Mandal, B. N. and Chakraborty, Rumpa, *Bull Cal Math Soc* **104** (2012) 533-546.
219. Water waves generated by instantaneous disturbances at the bed of a sloping beach, Chakraborty, Rumpa and Mandal, B. N., *Geophys. & Astrophys. Fluid Dyn.* **112** (2013) DOI :10.1080 /03091929.2012.732574
220. Solution of second kind integral equation with Cauchy type kernel using Daubechies scale function, Panja, M. M. and Mandal, B. N., *J. Comput. Appl. Math* **241** (2013) 130-142

221. Cauchy-Poisson problem for a two-layer fluid with an inertial surface, Dhillon, Harpreet and Mandal, B. N., *J Marine Science & Applic*, **12** (2013) 21-30.
222. An alternative approach for PDE-constrained optimization via genetic algorithm, Sahoo, L., Bhunia, A. K. , Pal , Debkumar and Mandal, B. N. , *J. Information and Computing Sci*, **8** (2013) 41-54
223. Water wave scattering by two thin vertical barriers with apertures, De, S., Mandal, B. N. and Chakrabarty, A. *Int. J. Appl. Math & Engng. Sci*

BOOKS

1. Mathematical Techniques for Water Waves, ed. Mandal, B. N., International Series on Advances in Fluid Mechanics, Vol. **8**, Computational Mechanics Publications, Southampton, U.K., (1997) .
2. Integral expansions related to Mehler-Fock type transforms, Mandal, B.N. and Mandal, N., Pitman Research Notes in Mathematics Series, Vol. **367**, Addison Wesley Longman, London, U.K., (1997).
3. Advances in dual integral equations, Mandal, B.N. and Mandal, N., Chapman & Hall/CRC Research Notes in Mathematics Series, Vol. **400** CRC Press, Boca Raton, U.S.A., (1999).
4. Water Waves Scattering by Barriers, Mandal, B.N. and Chakrabarti, A., WIT Press, Southampton, U.K., (2000).
5. Techniques in Applied Mathematics, Eds. U. Basu and B. N. Mandal, Narosa Publishing House, New Delhi, (2007).
6. Applied Mathematics, Eds. U. Basu and B. N. Mandal, Narosa Publishing House, New Delhi, (2008).
