Thesis Proposal Seminar

Date: June 25, 2026

Time: 02:30 PM

VENUE:

L-2, 4th Floor, A.N. Kolmogorov Bhavan, ISI Kolkata

SPEAKER:

Soumyadipta Maiti

Stat-Math Unit, ISI Kolkata

TITLE:

Shifted Convolution Sums

ABSTRACT:

Shifted convolution sums occupy a central position in modern analytic number theory due to their deep connections to moments of L-function. In this talk we will discuss various questions associated with shifted convolution sums formed with fourier coefficients of $GL(k)$ automorphic forms.

ALL ARE CORDIALLY INVITED
